## Subject: Regulation (EU) 2025/40 (PPWR) – Customer Information

Dear Sir or Madam,

Thank you for your enquiry regarding Regulation (EU) 2025/40 on packaging and packaging waste (PPWR).

Under Article 4(1) of the PPWR, from 12 August 2026 onwards, packaging and packaged products placed on the EU market must comply with the PPWR requirements applicable at the time of placing on the market.

As an importer and nationwide distributor of industrial fasteners and steel goods, virtually all our deliveries involve the use of packaging, including cartons, strapping, pallets and wrapping materials. We recognize that our customers require packaging that complies with the applicable PPWR requirements.

To support compliance with the PPWR, Kongerslev Fasteners ApS works closely with its suppliers and relies on relevant supplier information and documentation regarding the packaging used for supplied products:

- **Substance Restrictions:** We require packaging supplied with our products to comply with the applicable substance restrictions under Article 5 of the PPWR, based on information and documentation provided by our suppliers.
- **PFAS:** The specific PFAS restrictions under Article 5(5) of the PPWR apply to food-contact packaging. As our industrial fasteners and associated packaging are not intended for food contact, these specific PFAS limits are not applicable to our products and packaging.
- **Packaging Sourcing:** Standard transport packaging, where used by Kongerslev Fasteners ApS, is sourced from established packaging suppliers. For packaging elements sourced directly by Kongerslev Fasteners ApS, relevant supplier documentation is obtained and maintained where required.
- **Documentation:** Where applicable, relevant declarations and technical documentation are obtained from our suppliers and maintained as part of our compliance documentation. Relevant compliance information and documentation can be provided upon reasonable request, where applicable and available.
- **Extended Producer Responsibility (EPR):** Kongerslev Fasteners ApS complies with applicable Danish Extended Producer Responsibility (EPR) requirements for packaging, including relevant registration and reporting obligations.

Products received in original manufacturer packaging are generally resold in that packaging without repacking. In such cases, Kongerslev Fasteners ApS relies on the packaging compliance information and documentation provided by the respective manufacturer or supplier.

Packaging and packaged products already placed on the EU market prior to 12 August 2026 are not subject to the PPWR requirements applicable from that date. Further PPWR requirements will be phased in over the coming years. Some specific requirements and implementing measures are still being finalized at EU level.

We continue to monitor regulatory developments and work with our suppliers to ensure compliance with applicable PPWR requirements.

---

Yours faithfully,
**Kongerslev Fasteners ApS / Bolte.dk**
